Comprehension

SET - 45 [Q .218. to Q .222.]

The rise of e-commerce has dramatically reshaped retail landscapes around the world. Consumers now enjoy unprecedented convenience, i.e., with only a click, we can compare prices, read reviews, and deliver goods directly to their doors. Brick-and-mortar stores, in contrast, must contend with higher overheads - rent, utilities, and staffing - that online retailers often avoid. Many physical shops have adopted "omnichannel" strategies to stay competitive, integrating their online and in-store experiences. For example, customers might order online and pick up in - store or use a mobile app to check real-time stock levels before visiting. However, some challenges still persist for small retailers because they lack the technical expertise or capital to develop user-friendly websites, and excessive reliance on third-party delivery services can erode profit margins. Moreover, the environmental impact of rapid shipping - packaging waste and increased carbon emissions - is increasingly under scrutiny. As e-commerce continues its ascent, the most successful retailers will combine digital innovation with sustainable practices and a personalized customer experience.

06/08/2025 (Shift 1)

Q.218. What is the primary purpose of this passage?

(a) To advocate for brick-and-mortar retail over e-commerce

(b) To describe how omnichannel strategies are best

(c) To examine both opportunities and challenges in modern retail

(d) To explain why delivery services are harmful

Q.219. In context, the word "overheads" most nearly means:

(a) Profits

(b) Fixed expenses

(c) Revenues

(d) Discounts

Q.220. According to the passage, which of the following is NOT cited as a challenge for small retailers?

(a) Lack of technical expertise

(b) High utility bills

(c) Dependence on delivery services

(d) Environmental scrutiny

Q.221. The tone of the passage can best be described as:

(a) Alarmist (b) Analytical (c) Enthusiastic (d) Sarcastic

Q.222. Which inference is best supported by the passage?

(a) All retailers will eventually go fully online.

(b) Personalized experiences are key to future retail success.

(c) Third-party delivery is always unprofitable.

(d) Packaging waste has minimal impact on consumers.

SET - 46 [Q .223. to Q .227.]

Wildlife conservation has increased in importance since governments and NGOs have realized that locals are vital guardians of the environment. Instead of mandating top-down orders, successful initiatives recruit villagers to protect threatened species, serve as informants, and generate income from ecotourism. In other parts of Africa and Asia, community rangers are taught tracking and first aid, while women's organizations produce handicrafts out of sustainable forest products. These programs not only restrict poaching but also create ownership and pride in the maintenance of biodiversity. There are still obstacles, however: low funding levels, human-wildlife conflict, and uncertain land-use rights can undo success. Continued dialogue between stakeholders and equitable benefit-sharing mechanisms are essential in guaranteeing that conservation outcomes are directed to community well-being.

06/08/2025 (Shift 2)

Q.223. What is the primary focus of the passage?

(a) Criticize eco-tourism for harming wildlife

(b) Describe the role of communities in conservation

(c) Explain how poachers operate

(d) Advocate for stricter government enforcement

Q.224. In context, the phrase "top-down regulations" most nearly means:

(a) Rules created by local villagers

(b) Policies imposed by higher authorities

(c) Guidelines developed by scientists

(d) Suggestions from tourists

Q.225.According to the passage, which activity helps villagers earn income?

(a) Poaching endangered species

(b) Crafting handicrafts from sustainable Products

(c) Clearing forests for agriculture

(d) Mining minerals

Q.226. Which challenge is NOT mentioned as affecting community conservation?

(a) Human-wildlife conflicts (b) Inadequate funding

(c) Climate change

(d) Unclear land-use rights

Q.227. The tone of the passage is best described as:

(a) Pessimistic (b) Promotional (c) Objective (d) Sarcastic

SET - 47 [Q .228. to Q .232.]

Good public transport networks are the pillars of urban sustainability. Buses, trams, and metro lines can transport big groups of passengers without relying so much on private cars—and therefore eliminating traffic snarls and emissions. Integrated fares across modes of travel make it easy to move around: one ticket could pay for bus, train, and bike-share travel. Spending money on exclusive lanes and priority signaling also makes them faster and more dependable. Nonetheless, constructing and retaining such infrastructure requires capital and long-term vision. Equity issues are also important: lines need to serve low-income communities along with commercial hubs so that all citizens have a benefit. Finally, when properly planned, public transportation promotes economic efficiency, social mobility, and a cleaner city.

06/08/2025 (Shift 2)

Q.228. What is the central idea of the passage?

(a) Public transport is outdated in modern cities

(b) Investment in roads for private vehicles is more practical

(c) A strong public transport system is essential for sustainable and inclusive cities

(d) Public transport is mostly beneficial for tourists

Q.229. According to the passage, integrated fare systems:

(a) Create financial burden for low- income riders

(b) Make switching between travel modes easier

(c) Are only for long-distance travel

(d) Encourage use of private vehicles

Q.230. As per the passage, what is needed to maintain strong

public transport?

(a) Minimal regulation

www.ssccglpinnacle.com

Download Pinnacle Exam Preparation App

Pinnacle

Comprehension

(b) Frequent tech upgrades

(c) Sufficient funding and long-term planning

(d) Higher taxes on private vehicles

Q.231. How does public transport contribute to equity?

(a) By keeping fares high

(b) By focusing only on commercial zones

(c) By connecting low-income communities with wealthy areas

(d) By offering free rides on weekends

Q.232. What is the tone of the passage?

(a) Skeptical

(b) Analytical and supportive

(c) Neutral

(d) Aggressive

SET - 48 [Q .233. to Q .237.]

Universal immunization campaigns have eradicated or controlled fatal conditions such as smallpox and polio. Mass immunization relies on cold-chain availability: vaccines have to be stored at precise temperatures from manufacturing through inoculation.

Solar-powered refrigerators and insulated containers are lifelines for remote locations. Door-to-door interactions by community health workers educate households regarding dosage routines and myths. Vaccine hesitancy fueled by misinformation is also a major obstacle to herd immunity. Campaigns of public education— capitalizing on radio, social media, and school initiatives—seek to revive public faith in science. Preserving accessibility and communication in an open nature is crucial in order to secure public health.

06/08/2025 (Shift 3)

Q.233. What does "cold-chain logistics" refer to in the passage ?

(a) Transporting vaccines under controlled temperatures

(b) Selling vaccines in cold climates

(c) Developing new vaccine formulas

(d) Distributing medicines door-to-door

Q.234. According to the passage, which method helps maintain vaccine potency in remote areas ?

(a) Air-conditioned cars

(b) Solar-powered refrigerators

(c) Vaccine-heated containers

(d) Underground storage

Q.235. Vaccine hesitancy is primarily caused by :

(a) Lack of refrigerators

(b) Misinformation

(c) Cold-chain failures

(d) Overproduction

Q.236. Which strategy is NOT mentioned as part of public-education initiatives ?

(a) Radio broadcasts

(b) Social-media influencers

(c) School programs

(d) Financial incentives

Q.237. The passage suggests that to protect public health, it is essential to :

(a) Eliminate door-to-door visits

(b) Halt solar-powered technology

(c) Ensure equitable access and clear communication

(d) Focus solely on urban areas

SET - 49 [Q .238. to Q .242.]

Microfinance institutions (MFIs) have become crucial agents for advancing financial inclusion in rural areas. Through extending small loans and savings accounts to people who don't have access to conventional banks, MFIs empower entrepreneurs—most often women—to initiate or scale up microenterprises. In most villages, these loans support poultry farming, handloom weaving, or tiny retailing outlets. MFIs go beyond credit by regularly offering financial education training, teaching borrowers to cope with cash flows and interest charges. Critics warn, however, that excessive interest rates and repayment pressure can result in over-indebtedness. To avoid such risks, some MFIs limit interest rates and spread repayment terms. Research indicates that when complemented by market linkages—such as guaranteed buyers for fruits and vegetables—microfinance can trigger sustainable economic growth and poverty reduction.

06/08/2025 (Shift 3)

Q.238. The primary function of microfinance institutions, according to the passage, is to:

(a) Charge high interest rates to rural borrowers

(b) Provide large corporate loans

(c) Offer financial services to those excluded from traditional banking systems

(d) Regulate national monetary policy

Q.239. In the context of the above passage, "microenterprises" most nearly means:

(a) Multinational corporations (b) Small-scale businesses

(c) Government agencies

(d) Family-owned farms

Q.240. Which benefit of MFIs is mentioned besides lending money ?

(a) Granting land titles (b) Financial literacy training

(c) Tax exemptions

(d) Import-export facilitation

Q.241. What is a key criticism of microfinance highlighted in the passage?

(a) It fails to reach women borrowers.

(b) It offers only savings accounts.

(c) High interest and repayment pressure can cause debt.

(d) It mandates market linkages.

Q.242. According to the author, sustainable impact occurs when microfinance is combined with:

(a) High interest rates

(b) Market linkages

(c) Shorter loan tenures

(d) Government bailouts

SET - 50 [Q .243. to Q .247.]

As artificial intelligence (AI) technologies continue to proliferate across every sector of human activity, the ethical implications of their deployment have become a matter of urgent concern. Once relegated to the realm of speculative fiction, AI now permeates decision-making in fields as diverse as healthcare, finance, education, and criminal justice. While proponents argue that AI can increase efficiency, reduce human bias, and democratize access to services, critics warn of the potential for algorithmic discrimination, erosion of privacy, and the deepening of existing social inequalities.

At the heart of the debate lies a fundamental tension between technological progress and moral responsibility. Machines, no matter how sophisticated, lack consciousness and intrinsic values; they merely execute instructions based on data inputs and programmed algorithms. Thus, when an AI system makes a life-altering decision —such as denying a loan application or predicting a defendant's likelihood of reoffending—it is not the machine itself that is accountable, but the human architects behind its creation and training.

Moreover, the opacity of many AI systems, often referred to as the "black box" problem, poses a significant ethical challenge. When even developers cannot fully explain how a machine arrived at a given outcome, the prospect of ensuring fairness, transparency, and accountability becomes deeply problematic.

Download Pinnacle Exam Preparation App

Pinnacle

Comprehension

Addressing these concerns will require not only technical innovations, such as explainable AI, but also rigorous interdisciplinary collaboration between engineers, ethicists, policymakers, and the public.

07/08/2025 (Shift 1)

Q.243. Which of the following correctly identifies the tense used predominantly in the first paragraph ?

(a) Past perfect

(b) Present continuous

(c) Present perfect continuous (d) Present simple

Q.244. "At the heart of the debate lies a fundamental tension between technological progress and moral responsibility."

(a) Compound

(b) Complex

(c) Simple

(d) Compound-Complex

Q.245. What does the word "proliferate" most nearly mean as used in the passage ?

(a) Decline slowly

(b) Spread rapidly

(c) Change unpredictably

(d) Improve steadily

Q.246. In the context of the passage, the phrase "algorithmic

discrimination" most likely refers to:

(a) Computers correcting human mistakes.

(b) AI systems treating individuals unfairly based on biased programming.

(c) AI systems achieving perfect objectivity.

(d) The classification of data without errors.

Q.247. According to the passage, what is one major obstacle to ensuring fairness and accountability in AI systems ?

(a) The high cost of building AI models.

(b) The limited availability of data scientists.

(c) The inability to fully explain how AI systems reach conclusions.

(d) The lack of government funding.

SET - 51 [Q .248. to Q .252.]

Changes that seem small and unimportant at first will compound into remarkable results if you're willing to stick with them for years. We often convince ourselves that massive success requires massive action. Whether it's losing weight, building a business, or learning a new skill, we put pressure on ourselves to make some earth-shattering improvement that everyone will notice.

However, improvement by just 1 percent each day may not be noticeable in the moment, but over time it can be far more meaningful. The same way that money compounds with interest, the effects of your habits multiply as you repeat them. The outcomes you see in your life today are often the result of small choices made over time, rather than dramatic changes.

This is why habits are the compound interest of self-improvement. The longer you stick with them, the greater the returns. But just as positive habits can compound in your favor, negative habits can compound against you. A slight slip in discipline today may not seem like a big deal, but if repeated, it can steer you in a completely different direction.

Success, then, is not a single event-it is the result of daily choices, made consistently over time.

07/08/2025 (Shift 2)

Q.248. Identify the sentence with the correct use of subject-verb agreement:

(a) The effects of your habits multiplies as you repeat them.

(b) The outcomes you see in your life today is often the result of small choices made over time.

(c) The effects of your habits multiply as you repeat them.

(d) The outcomes of your daily decisions determines your long-term success.

Q.249. "Changes that seem small and unimportant at first will compound into remarkable results if you're willing to stick with them for years."

(a) To decrease gradually

(b) To mix different elements

(c) To accumulate and grow over time

(d) To remain constant

Q.250. "A slight slip in discipline today may not seem like a big deal, but if repeated, it can steer you in a completely different direction."

(a) Commitment

(b) Carelessness

(c) Determination

(d) Focus

Q.251. What is the main idea of the passage?

(a) Success comes from making one major change in life.

(b) Small daily improvements, when repeated consistently, lead to significant long-term results.

(c) Negative habits have no real impact unless they are extreme.

(d) Success is mostly determined by luck rather than effort.

Q.252. What type of pronoun is the word "This" in the sentence,

"This is why habits are the compound interest of self-improvement."?

(a) Demonstrative pronoun

(b) Reflexive pronoun

(c) Abstract pronoun

SET - 52 [Q .253. to Q .257.]

(d) Subjective pronoun

Freedom of speech is a cornerstone of democratic societies, allowing individuals to express ideas, question authority, and promote change. However, in the digital world, this right encounters complex challenges. Social media platforms have become arenas where opinions can be voiced instantly-but also where hate speech, misinformation, and cyberbullying thrive. Balancing the right to speak freely with the responsibility to prevent harm is now a pressing debate. Should platforms censor harmful content, or would that violate freedom? While some argue that regulation is essential to protect vulnerable groups, others fear it might lead to suppression of dissent. The problem deepens when private companies-not elected bodies - decide what speech is allowed or banned. Striking the right balance requires thoughtful policies, digital literacy, and legal frameworks rooted in both human rights and public safety. In a world where words travel faster than thought, protecting free speech without enabling harm may be one of the defining tests of modern democracy.

07/08/2025 (Shift 2)

Q.253. What central conflict is explored in the passage?

(a) Law vs. religion

(b) Profit vs. loss

(c) Freedom vs. online harm (d) Privacy vs. piracy

Q.254. Why is regulation of speech on social media

controversial?

(a) It is illegal in all democracies

(b) It gives too much power to users

(c) It may suppress dissenting voices

(d) It slows down communication

Q.255. What is the concern about private companies controlling speech ?

(a) They are too small to influence politics

www.ssccglpinnacle.com

Download Pinnacle Exam Preparation App

Pinnacle

Comprehension

(b) They lack legal authority or accountability

(c) They promote academic debates

(d) Not Answered

Q.256. According to the author, what is required to resolve this conflict ?

(a) Removing all harmful users

(b) Allowing complete freedom

(c) Combining rights with safety through law and literacy

(d) Banning social media worldwide

Q.257. What tone does the author adopt in the passage?

(a) Dismissive

(b) Alarmist

(c) Balanced and reflective

SET - 53 [Q .258. to Q .262.]

(d) Aggressive

In the age of endless options-from streaming services to social media platforms-modern individuals face what psychologists call "decision fatigue." Unlike earlier generations who had limited choices, today's youth are constantly required to decide: what to watch, whom to follow, what to share, and how to respond. While freedom of choice is often celebrated, too many choices can lead to stress, dissatisfaction, and even paralysis. Ironically, abundance can become overwhelming. Algorithms, designed to predict preferences, often narrow exposure rather than broaden it, creating digital bubbles. People may feel in control, yet their choices are subtly shaped by unseen patterns. Over time, the constant need to choose can drain mental energy, leaving individuals anxious or indifferent. True digital freedom may lie not in limitless options, but in mindful engagement and setting personal boundaries. Recognising when to choose-and when to step back-could be the new wisdom of the connected age

07/08/2025 (Shift 3)

Q.258. What is the main issue discussed in the passage ?

(a) Rise of social media trends

(b) Overuse of mobile apps

(c) Stress caused by excessive digital choices

(d) Lack of internet literacy

Q.259. What does the author imply about algorithms ?

(a) They always give better choices

(b) They expand one's interests

(c) They limit exposure to diverse content

(d) They reduce online ads

Q.260. What paradox is presented in the passage ?

(a) Choice leads to control but also exhaustion

(b) Technology helps only the rich

(c) More apps mean less productivity

(d) Less data brings more security

Q.261. According to the author, what may

be a solution ?

(a) Faster internet plans

(b) Reducing social media apps

(c) Mindful engagement and limits

(d) Following more influencers

Q.262. What is the tone of the passage ?

(a) Sarcastic (b) Cautionary (c) Indifferent (d) Aggressive

SET - 54 [Q .263. to Q .267.]

Much of the discussion in this book is about biases of intuition. However, the focus on biases does not mean that intuition is always wrong-far from it. Most of the time, the quick judgments of our intuitive mind, what I call System 1, are accurate enough to help us navigate the world. This system operates automatically and quickly, with little or no effort.

On the other hand, System 2 is the slower, more deliberate mode of thinking. It allocates attention to effortful mental activities, such as solving complex problems or evaluating logical arguments. System 2 is more methodical and rational, but it is also lazier-it prefers to endorse the intuitions of System 1 rather than question them.

This division of labour works well most of the time, but it also creates predictable errors. Because System 1 is prone to biases and snap judgments, we often make decisions that are not as rational as we believe. Understanding these two systems can help us recognize when we are relying too much on intuition and when we need to engage in more deliberate thinking.

07/08/2025 (Shift 3)

Q.263. Identify the sentence with correct subject-verb agreement:

(a) The quick judgments of our intuitive mind, what I call System 1, is accurate enough to help us navigate the world.

(b) This division of labor work well most of the time, but it also creates predictable errors.

(c) Understanding these two systems can helps us recognize when we are relying too much on intuition.

(d) System 2 allocates attention to effortful mental activities, such as solving complex problems or evaluating logical arguments.

Q.264. Choose the sentence that correctly uses a relative pronoun:

(a) System 1 is the intuitive mode of thinking, who operates automatically and quickly.

(b) The biases, which influence our judgments, often lead to predictable errors.

(c) Understanding the two systems, whom have different roles, is crucial for decision-making.

(d) The effortful mental activities whose System 2 performs include solving complex problems.

Q.265. What is the meaning of the word "deliberate" in the sentence:

"System 2 is the slower, more deliberate mode of thinking."

(a) Accidental

(b) Careful and intentional

(c) Quick and effortless

(d) Biased

Q.266. Choose the best synonym for the word "endorse" in the sentence:

"System 2 is more methodical and rational, but it is also lazier-it prefers to endorse the intuitions of System 1 rather than question them."

(a) Approve

(b) Reject

(c) Criticize

(d) Delay

Q.267. According to the passage, what is one drawback of System 1 thinking ?

(a) It always leads to incorrect decisions.

(b) It requires too much mental effort.

(c) It can be prone to biases and snap judgments.

(d) It completely replaces System 2 in decision-making.

SET - 55 [Q .268. to Q .272.]

In a small village, a government school has become an example of clean energy use. The school uses solar panels to run fans, lights, and even computers. This helps the school save money on electricity bills. The saved money is used to buy books and

www.ssccglpinnacle.com

Download Pinnacle Exam Preparation App

Pinnacle

Comprehension

improve classrooms. The teachers also explain to students how solar energy works and why it is good for the planet. Students learn that solar power does not cause pollution like coal or petrol. The school has also inspired nearby houses to install solar panels. This change has made the village cleaner and more aware of the environment. Even on cloudy days, the solar battery stores enough power to keep the school running. With small steps like this, more schools and homes can help protect nature and build a better future.

08/08/2025 (Shift 1)

Q.268. What energy source does the school use?

(a) Petrol

(b) Wind

(c) Solar

(d) Gas

Q.269. What does the school do with saved electricity money?

(a) Build a playground

(b) Buy food

(c) Buy books and improve classrooms (d) Hire more teachers

Q.270. Why is solar energy better than coal?

(a) It is cheaper to burn

(b) It does not cause pollution

(c) It is easier to store

(d) It is available in bottles

Q.271. What did the school inspire villagers to do?

(a) Use less water

(b) Buy new uniforms

(c) Install solar panels

(d) Visit the school more

Q.272. What helps the school on cloudy days?

(a) Electricity from the city

(b) Fans from other schools

(c) Solar batteries

SET - 56 [Q .273. to Q .277.]

(d) Teachers' phones

The rise of genetic engineering has redefined what is scientifically possible, but not necessarily what is ethically acceptable. While gene editing offers hope in treating inherited diseases and improving crop resilience, it also raises profound moral questions. Should we edit genes to enhance intelligence or physical ability? Where do we draw the line between therapy and enhancement? These questions remain unsettled. Some argue that altering the human genome for non-medical reasons may lead to a new form of inequality—where the genetically modified have social advantages over others. Others fear unintended consequences: once a gene is changed, its effects may ripple through generations. Science often moves faster than legislation, leaving ethical frameworks lagging behind. True progress lies not in what we can do, but in what we choose to do responsibly. As with all powerful tools, genetic engineering demands caution, reflection, and a shared sense of human values.

08/08/2025 (Shift 1)

Q.273. What is the central concern of the passage?

(a) Costs of gene therapy

(b) Government control of science

(c) Ethical use of genetic engineering

(d) Advances in medical devices

Q.274. What does the author suggest about using genes to enhance traits?

(a) It improves global health

(b) It is encouraged by law

(c) It risks creating inequality

(d) It always benefits society

Q.275. Why are ethical frameworks struggling to keep up?

(a) Scientists disagree

(b) Public lacks interest

(c) Laws are faster than research (d) Science progresses rapidly

Q.276. What does the author imply about gene editing's long-term impact?

(a) It is fully reversible

(b) It can affect future generations

(c) It has no proven results (d) It only benefits the rich

Q.277. Which phrase best captures the author's message?

(a) "Edit now, regret later"

(b) "Act fast and innovate"

(c) "Caution must guide progress" (d) "All science is safe"

SET - 57 [Q .278. to Q .282.]

Theme: The Dandi March

Sector: Indian History / Freedom Movement In 1930, Mahatma Gandhi started a peaceful protest called the Dandi March. He and his followers walked 240 kilometers from Sabarmati Ashram to Dandi, a village near the sea. The purpose of the march was to protest the British law that taxed salt. Salt is a basic need for everyone, and Gandhi believed it was unfair to make people pay for it. During the march, more and more people joined him. The British government tried to stop the movement, but Gandhi remained calm and peaceful. He made salt from the sea at Dandi, breaking the law in a non-violent way. The Dandi March became a strong symbol of India's fight for freedom. It showed the world that peaceful protest could be powerful. Even today, it is remembered as a brave step in India's struggle for independence.

08/08/2025 (Shift 2)

Q.278. Who led the Dandi March ?

(a) Subhas Chandra Bose (b) Jawaharlal Nehru

(c) Bhagat Singh

(d) Mahatma Gandhi

Q.279. Why was the march started ?

(a) To support education

(b) To protest salt tax

(c) To celebrate independence

(d) To fight a war

Q.280. How did Gandhi break the law?

(a) By fighting soldiers

(b) By leaving the country

(c) By making salt from the sea (d) By closing schools

Q.281. What was the distance covered in the march?

(a) 100 km (b) 500 km (c) 240 km (d) 50 km

Q.282. What does the Dandi March symbolize today?

(a) Peaceful protest and courage (b) Use of violence in freedom

(c) Marching for exercise

(d) Tax collection by British

SET - 58 [Q .283. to Q .287.]

As algorithms increasingly curate our digital experiences — what we read, watch, buy, or even whom we date — they quietly shape our perception of the world. This phenomenon, known as "algorithmic living," promises efficiency but risks eroding autonomy. When choices are filtered through predictive systems, personal agency may weaken, and individuals might mistake convenience for control. Moreover, algorithmic personalization often traps users in feedback loops, reinforcing existing preferences and limiting exposure to diverse perspectives. Over time, this can lead to cognitive narrowing, where users become less open to alternative views or new ideas. While algorithms are not inherently harmful, their unchecked influence raises ethical concerns about manipulation and passive consumption. True digital well-being demands critical awareness — not of the machine, but of how we engage with it. In a world increasingly optimized for us, the question is not what the algorithm shows, but whether we are still choosing to look beyond it.

08/08/2025 (Shift 2)

Q.283. What is the main concern of "algorithmic living"?

www.ssccglpinnacle.com

Download Pinnacle Exam Preparation App

Pinnacle

Comprehension

(a) Faster online shopping

(b) Decline in physical activity

(c) Loss of autonomy due to filtered choices

(d) Increased cost of internet

Q.284. What does the term "feedback loop" imply in the passage?

(a) Randomized search results

(b) Repeated exposure to similar content

(c) Feedback from social media users

(d) Technological malfunctions

Q.285. How does algorithmic living affect thinking over time?

(a) It enhances creative thinking

(b) It encourages scientific research

(c) It narrows perspective and reduces openness

(d) It develops emotional intelligence

Q.286. What is suggested as a way to maintain digital well-being?

(a) Ignore all online content

(b) Follow only algorithmic suggestions

(c) Practice critical engagement

(d) Increase screen time

Q.287. What is the tone of the passage?

(a) Casual and humorous

(b) Cautious and reflective

(c) Dismissive and skeptical (d) Optimistic and enthusiastic

SET - 59 [Q .288. to Q .292.]

In today's digital age, convenience often comes at the cost of privacy. Every time a user browses a website, clicks a link, or uses an app, their data is collected —sometimes without their knowledge. Companies use this information to target ads, predict behavior, or even sell insights to third parties. While this can lead to better services, it also raises ethical concerns. Who controls this data? How is it stored, and can users truly opt out? Many people accept terms and conditions without reading them, unknowingly giving permission for data tracking. Some countries have passed laws to protect user data, but implementation remains weak. As surveillance tools grow smarter, the line between public and private becomes blurred. Individuals must now learn to balance the benefits of technology with the right to privacy—a task that requires awareness, regulation, and responsible digital behavior.

08/08/2025 (Shift 3)

Q.288. What is the main concern raised in the passage?

(a) Lack of internet speed

(b) High cost of mobile data

(c) Threats to digital privacy (d) Overuse of technology

Q.289. According to the passage, how is user data often collected?

(a) Only with government approval

(b) Through printed forms

(c) Without users being fully aware

(d) After signing hardcopy documents

Q.290. What does the passage say about laws protecting data?

(a) They are strong and global

(b) They are strict in all countries

(c) They exist but are poorly enforced

(d) They are unnecessary

Q.291. What is one positive use of user data mentioned in the passage?

(a) Reducing screen time (b) Improving service experiences

(c) Blocking global access (d) Avoiding social media

Q.292. What does the author suggest is needed to protect privacy?

(a) Avoiding all apps

(b) Stronger surveillance tools

(c) Awareness and responsible behavior

(d) Free mobile phones for all

SET - 60 [Q .293. to Q .297.]

Artificial Intelligence (AI) is gradually transforming the way students learn. From virtual tutors to personalized learning paths, AI helps identify each learner's strengths and weaknesses. With the help of data, AI systems can suggest specific topics where students need improvement. Schools are also using AI chatbots to answer basic queries, reducing the pressure on teachers. However, experts warn that over-dependence on AI may limit critical thinking. If students rely too much on machines for answers, they may lose problem-solving skills. There are also concerns about data privacy, especially when student performance data is stored online. Despite these issues, many educators believe AI can be a useful tool when used wisely. Like any technology, the key lies in balancing human guidance with machine efficiency.

Q.293. What does AI mainly help with in education?

(a) Giving marks

(b) Personalizing learning

(c) Hiring teachers

(d) Fixing school buildings

Q.294. What is a possible risk of overusing AI?

(a) Higher costs

(b) Fewer classrooms

(c) Poor thinking skills

(d) Better results

Q.295. Why are AI chatbots used in schools?

(a) To monitor cameras

(b) To take exams

(c) To answer student questions

(d) To conduct interviews

Q.296. What is a concern related to student data?

(a) Attendance drops

(b) Internet speed

(c) Data privacy

(d) Exam cheating

Q.297. What is the author's final advice?

(a) Replace teachers

(b) Use only AI

(c) Balance tech and human input (d) Avoid all AI
